KMeans (k=4) (s3) - v1

KMeans (k=4)

Cluster outliers

Trained in 3 seconds on 488 records

Observations

- hiver_Member_count is in average 250% greater: mean of 9106 against 2599 globally
- Member_midi_count is in average 228% greater : mean of 9544 against 2906 globally
- **printemps_Member_count** is in average 241% greater : mean of 14015 against 4107 globally

Model

Model ID	S-BIKESHARING-4mJSgeDX-1679494045815
Model type	Clustering
Code Env	DSS builtin env
Python version	3.6.8

Carte des clusters

Nombre moyen de départ par cluster 2015-2017 Périphérie éloigné Centre et pér... Zone ...

Données de bases sur clusters

Répartition au cours de la semaine

Répartition en fonction de la plage horaiare

Répartition en fonction de la saison

Répartition de la durée des voyages au cours de la semaine

Répartition de la durée des voyages au cours la journée

Répartition de la durée des voyages selon la saison

Les clusters

Zone Touristique

- fort trafic, en particulier le weekend (casual et membres)
- 。localisé à Washington, dans une région comprenant de nombreux monuments

Centre et périphérie

- Voyage plus court, semblable au cluster d'affaires
- faible trafic

Périphérie éloignée

- Voyages longs mais peu nombreux
- faible trafic

Zone d'affaires

- trajet court avec un pique d'influence le matin (aller) et l'après-midi (retour)
- fort trafic (membres)

Recommandation

Disponibilité des vélos

- S'assurer une quantité de vélos suffisante pour les stations ayant le plus fort trafic
- our les stations où les trajets sont les plus long

Entretien de l'infrastructure

Surveiller l'état des stations les plus utilisées

Offre promotionnel et touristique

proposer des offres adaptées aux caractéristiques des clusters

Retour d'expérience

Avantages

- Gain de productivité
- Concentration sur l'analyse des données et du clustering plutôt que le codage
- Centralisation des processus
- Facilité de prise en main

Inconvénients

- Manque de flexibilité
- Plugins capricieux
- Documentation obscure
- Performances
- Sécurité des données et dépendance au service
